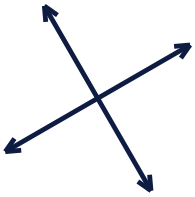
Name: _____ **Date:** _____

DIRECTIONS

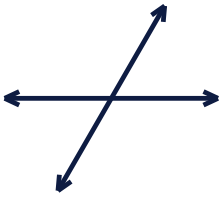
This Independent Practice is for Lesson 4.16.01.
Write your answers on the lines.
Perpendicular lines meet at a right angle. They make square corners.
Use the corner of an index card or a sheet of paper to check.

1 Perpendicular or not?

Write P under each pair that is perpendicular and N under each pair that is not.



A: _____



B: _____

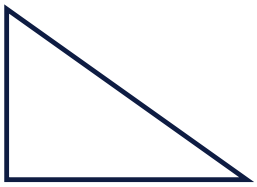
C: _____

D: _____

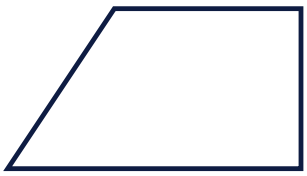
2 Right angles in shapes

Mark each right angle with a small square. How many right angles does each shape have?

Rectangle: _____



Right triangle: _____



Trapezoid: _____

3 Around you

Name two places in your home or classroom where you see perpendicular lines or segments.

THINK: WINDOWS, DOORS, BOOKS, FLOOR TILES...

1. _____ _____ **2.** _____ _____

4 Draw it

Draw a line segment. Then draw a second segment that is perpendicular to it. Mark the right angle.

USE THE CORNER OF AN INDEX CARD TO CHECK

5 Is Theo right?

Theo says two lines on a slant can’t be perpendicular. Is he right? Draw a picture to explain.

TURN YOUR PAPER

Answer: _____ _____ _____
