Name: _____ **Date:** _____

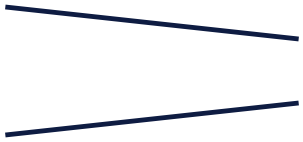
DIRECTIONS

This Independent Practice is for Lesson 4.16.02.
Write your answers on the lines.
Parallel lines go the same direction and stay the same distance apart. They never meet.
Use a ruler to check the gap at both ends.

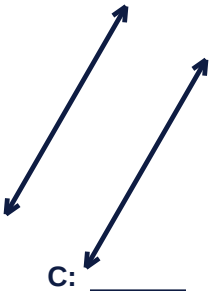
1 Parallel or not?

Write Y if the lines are parallel and N if they are not.

A: _____



B: _____



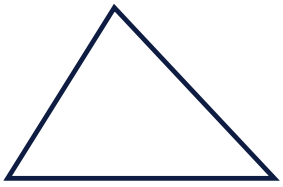
C: _____

2 Parallel sides in shapes

Mark parallel sides with arrows. How many pairs of parallel sides does each shape have?

Trapezoid: _____

Parallelogram: _____



Triangle: _____

3 Letters

Which of these capital letters have parallel line segments? Mark the parallel parts.

H E N V Z T

Answer: _____ _____

4 Both kinds

Draw a shape that has one pair of parallel sides AND at least one pair of perpendicular sides.

Mark the parallel sides with arrows and the right angles with small squares.

MY SHAPE

5 Will they meet?

Kai measured the gap between two lines. It was 3 cm on the left end and 5 cm on the right end.

Are the lines parallel? If not, which way would you go to find where they meet?

SAME GAP? GETTING CLOSER?

Answer: _____ _____ _____
