Name: _____ **Date:** _____

DIRECTIONS

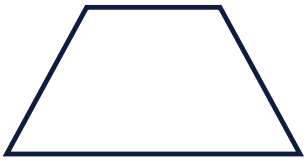
This Independent Practice is for Lesson 4.16.04.
Write your answers on the lines.
Check three clues: pairs of parallel sides, right angles, and equal sides.
Some shapes have more than one name. Give the best name, the one that tells the most.

1 Quadrilateral chart

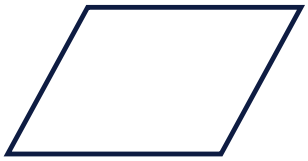
Shape	Pairs of parallel sides	Right angles	All sides equal?
Square	_____	_____	_____
Rectangle	_____	_____	_____
Rhombus	_____	_____	_____
Parallelogram	_____	_____	_____
Trapezoid	_____	_____	_____

2 Name the lot

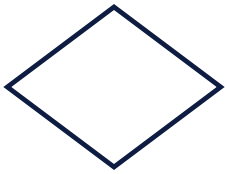
Write the best name for each shape.



a) _____



b) _____



c) _____

3 Who am I?

(a) I have 4 equal sides and no right angles. (b) I have exactly one pair of parallel sides.

(c) I have 4 right angles, but my sides are not all equal.

USE YOUR CHART

(a) _____ **(b)** _____ **(c)** _____

4 True or false? Explain.

(a) Every square is a rectangle. (b) Every rectangle is a square. (c) Every rhombus is a parallelogram.

WHAT DOES EACH SHAPE NEED?

(a) _____ **(b)** _____ **(c)** _____

5 Draw it

Draw a parallelogram that is NOT a rectangle. Mark the parallel sides with arrows.

MY PARALLELOGRAM
