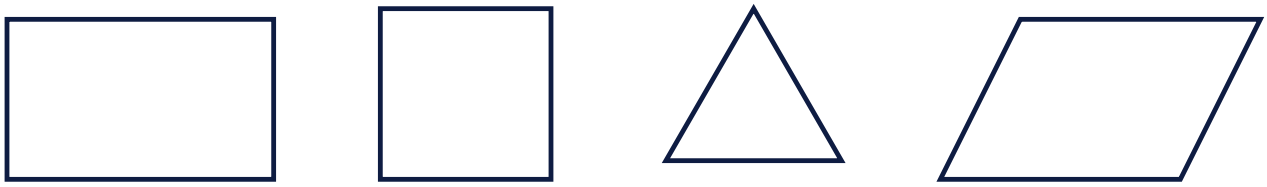
Name: _____ **Date:** _____

DIRECTIONS

This Independent Practice is for Lesson 4.16.05.
Draw lines with a ruler. Write your answers on the lines.
A line of symmetry splits a shape into two halves that match exactly when folded.
Test every possible fold: up and down, across, and corner to corner.

1 How many lines of symmetry?

Draw all the lines of symmetry. Then write how many each shape has.



A: _____ **B:** _____ **C:** _____ **D:** _____

2 Letters

Which letters have at least one line of symmetry? Draw the lines.

A H S M F O

Letters with symmetry: _____ _____

3 Is it a line of symmetry?

Theo folded a rectangle along its diagonal and said the diagonal is a line of symmetry. Is he correct? Explain.

DO THE TWO HALVES MATCH EXACTLY WHEN FOLDED?

Answer: _____ _____ _____

4 Real things

Name one thing in your home with exactly one line of symmetry and one thing with more than one.

THINK: A SPOON, A WINDOW, A PLATE, A CHAIR...

One line: _____ **More than one:** _____

5 Make your own

Draw a shape that has exactly one line of symmetry. Draw the line with a dashed line.
