Name: _____ **Date:** _____

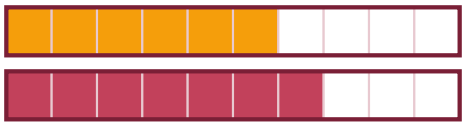
DIRECTIONS

This Independent Practice is for Lesson 4.13.02.
Show your work. Write your final answer on the line.
Add the tenths first. If they add up to 10 or more, trade 10 tenths for 1 one.
Estimate first, then check that your answer is close.

1 Too many tenths for one strip

Each strip is one whole (10 tenths). Add the orange tenths and the red tenths.
They won't fit in one strip, so you get one whole strip and some left over.

(a)

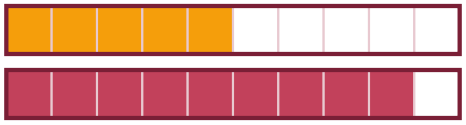


0. _____ + 0. _____ = _____

(b)

0. _____ + 0. _____ = _____

(c)



0. _____ + 0. _____ = _____

Example: 7 orange + 4 red = 11 tenths = 1 whole and 1 tenth → 0.7 + 0.4 = 1.1

2 Trade the tenths

(a) 14 tenths = _____ one and _____ tenths = _____

(b) 20 tenths = _____ ones and _____ tenths = _____

(c) 31 tenths = _____ ones and _____ tenth = _____

10 TENTHS = 1 ONE

© Optima Academy Online

3 Add with regrouping

Add the tenths. Trade if you need to. Write a small 1 above the ones when you trade.

(a)

$$\begin{array}{r} 0.7 \\ +\ 0.8 \\ \hline \\ \end{array}$$

(b)

$$\begin{array}{r} 2.6 \\ +\ 1.5 \\ \hline \\ \end{array}$$

(c)

$$\begin{array}{r} 3.9 \\ +\ 4.3 \\ \hline \\ \end{array}$$

4 Find the mistake

Jo added 1.8 + 0.5 and got 1.13.

Use an estimate to show that 1.13 can’t be right. Then explain Jo’s mistake and find the right sum.

ESTIMATE: ABOUT 2 + ABOUT 0.5 = ?

Right sum: _____

5 Word problem — ribbon for the party

Ana has two pieces of ribbon. One is 1.6 m long. The other is 2.7 m long.

(a) Estimate: about how many meters of ribbon does she have?

(b) Find the exact total.

(c) She needs 4 m to wrap the party table. Does she have enough? Explain.

ESTIMATE; ADD THE TENTHS; TRADE; ADD THE ONES

(a) about _____ m **(b)** _____ m **(c)** _____
