Name: _____ **Date:** _____

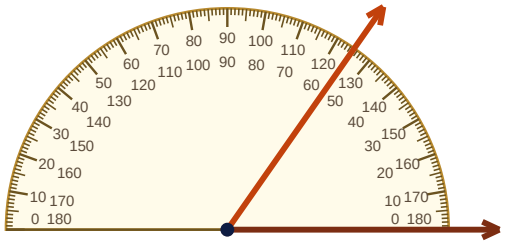
DIRECTIONS

This Independent Practice is for Lesson 4.15.02.
Write your answers on the lines.
Estimate first: less than 90° or more than 90°?
Center mark on the vertex. Start at the 0 on one ray. Read where the other ray crosses.

1 Read the protractor

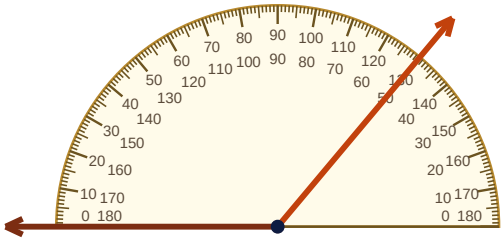
What is the measure of each angle?

(a)



(a) _____ °

(b)



(b) _____ °

(c) Is the angle in (b) acute or obtuse? _____ How do you know? _____ _____

2 Two rows of numbers

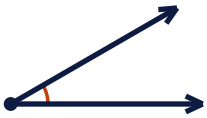
The two rows always add up to 180. If one row says 35, the other row says _____.

If one row says 120, the other row says _____. If one row says 90, the other row says _____.

3 Estimate, then measure

Use your protractor. Write your estimate first (less or more than 90°). Then measure.

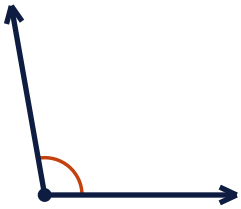
A



A: estimate _____

measure _____ °

B



B: estimate _____

measure _____ °

C

C: estimate _____

measure _____ °

4 Find the mistake

Imani measured the angle in Problem 1(b) and wrote 50°.

(a) What mistake did she make? (b) How could an estimate have helped her catch it?

IS THE ANGLE SMALLER OR BIGGER THAN A SQUARE CORNER?
