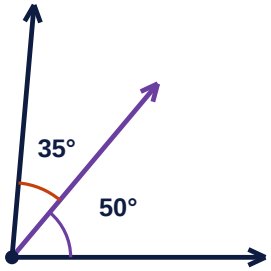
Name: _____ **Date:** _____

DIRECTIONS

This Independent Practice is for Lesson 4.15.04.
Write an equation for each problem. Write your answer on the line.
Part + part = whole. Whole – part = the other part.
Landmarks: a right angle is 90°. A straight line is 180°. A part is never bigger than the whole.

1 Find the whole

The angle is made of two smaller angles. What is the whole angle?

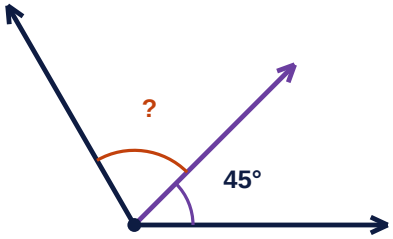


Equation: _____

Whole angle: _____ °

2 Find the missing part

The whole angle measures 120°. One part is 45°. What is the other part?

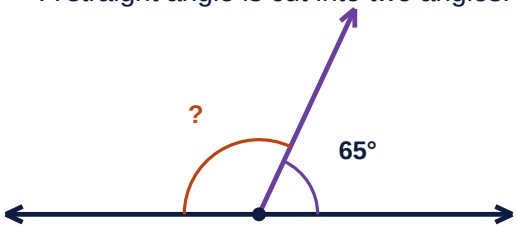


Equation: _____

Missing part: _____ °

3 On a straight line

A straight angle is cut into two angles. One is 65°. What is the other?

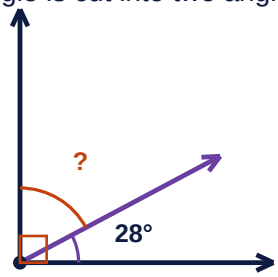


Equation: _____

Answer: _____ °

4 Inside a right angle

A right angle is cut into two angles. One is 28°. What is the other?

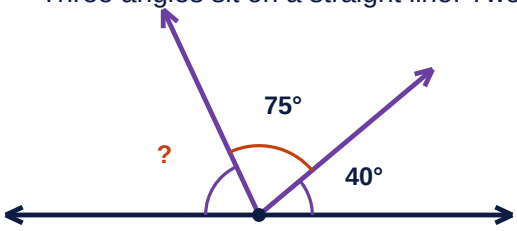


Equation: _____

Answer: _____ °

5 Three angles on a line

Three angles sit on a straight line. Two of them are 40° and 75°. Find the third angle.



Equation: _____

Third angle: _____ °
