Name: _____ **Date:** _____

DIRECTIONS

This Independent Practice is for Lesson 4.15.05.
Write your answers on the lines.
A full turn is 360°. A reflex angle is more than 180° and less than 360°.
Inside angle + outside angle = 360°. So the outside angle = 360 – the inside angle.

1 Is it reflex?

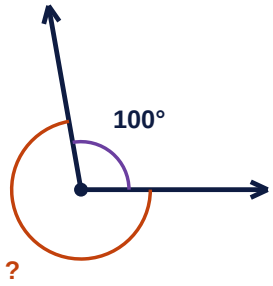
Circle the reflex angles. 250° 160° 300° 180° 200° 90°

MORE THAN 180°, LESS THAN 360°

Reflex angles: _____ _____

2 The angle outside

The inside angle is 100°. What is the reflex angle on the outside?



Equation: _____

Outside angle: _____°

3 Find each reflex angle

Find the reflex angle that goes with each inside angle.

(a) 45° → _____° (b) 130° → _____° (c) 90° → _____°

360 – INSIDE ANGLE

4 Clock challenge

Each number on a clock is 30° apart. Find the small angle and the reflex angle between the hands.

(a) 2:00

small angle _____ °

reflex angle _____ °

(b) 4:00

small angle _____ °

reflex angle _____ °

5 Skate tricks

Theo spins a half turn. Then, without stopping, he spins one more quarter turn the same way.

(a) How many degrees did he turn in all? (b) What kind of angle is that? How do you know?

A HALF TURN IS 180°. A QUARTER TURN IS 90°.

(a) _____ ° **(b)** _____ _____
